

Transition & Follow-Up

1. Assisting with the transition

As the selected candidate transitions into the new role, we communicate regularly with her/him and the client institution and help facilitate any questions or challenges that arise. It is our aim to ensure that the transition is successful and that the new leader is prepared to establish him/herself at the outset of the appointment.

2. Evaluating the search

As part of our ongoing effort to continually enhance our search process, we request that both the client and successful candidate evaluate the search experience.

3. Additional support

If desired by the client, we also offer optional, complementary consulting services, primarily via a consortium of partners, in the areas of:

- Executive development
- Organizational development
- Succession planning
